Introduction

This document will cover how to migrate an application to newer versions of the S312 SoftDevices. Specifically, this document addresses the required application changes related to the ANT portion of the SoftDevice. This document should be used in conjunction with the S112 migration notes for the SoC/BLE portions of a migration.

6.1.1->7.0.1 Migration

There are no changes to the ANT stack between these versions. The S112 migration notes should be reviewed as changes were made to the SoC and BLE APIs.
