Introduction

This document will cover how to migrate an application to the S313 SoftDevices. Specifically, this document addresses the required application changes related to the ANT portion of the SoftDevice. This document should be used in conjunction with the S113 migration notes for the SoC/BLE portions of a migration.

6.1.1->7.0.1 Migration

There are no required API changes to the ANT stack between the S312 version 6.1.1 and the S313 version 7.0.1. The S113 migration notes should be reviewed as changes were made to the SoC and BLE APIs.
